

12V 8 Amp Intelligent 8 Stage Battery Charger with DC power supply

The 12V 8 Amp 8 Stage Smart Battery Chargers are designed to effectively charge most battery types; Lead-acid, Calcium, maintenance free, Gel and AGM. They have a feature that allows the battery charger to automatically select the battery chemistry. This unit has a 13.5V DC power source mode, and it can be used on many 12V household appliances.

Features:

1. Automatic selection of battery chemistry for GEL, AGM, Lead acid. With manual selection for Calcium charging.
2. Able to test battery condition while charging and turns off if battery is faulty.
3. Zero volt battery minimum start up-can charge a completely discharged battery.
4. Short circuit, reverse polarity connection, over-temperature, overload protection.
5. 13.5V 8A DC power source (with voice confirmation) which can be applied to many 12V household appliances.
6. CE, EMC, ROHS safety approved.
7. LED screen clearly displays charge status and all output status.
